Your audience

- **QA and engineering managers** planning team tooling and hiring
- **Senior engineers and SDETs** who evaluate and champion new tools
- **Architects and leads** shaping automation and AI-testing strategy
- **Rising testers** who will carry your product into their next company

The host

Rahul Shetty began teaching software testing online in 2016 with one goal: make practical QA education affordable. Today his courses reach roughly 1.3 million learners in 201 countries, and he is an Udemy Instructor Partner.

QA Summit takes that relationship offline. Sponsors share a stage in front of people who learned from him and trust his recommendations.
